Fluor Daniel announced today it has been awarded a contract by Air Products and Chemicals, Inc., on behalf of Bangkok Cogeneration Co. Ltd., a Thailand-based joint venture, for a cogeneration project in the Map Ta Phut Industrial Estate in Rayong Province, Thailand. The value of the contract was not disclosed.

Fluor Daniel’s Power Generation operating company is providing project management, engineering, procurement, construction and start-up services for the 112-megawatt combined-cycle cogeneration power plant. The plant will provide up to 90 megawatts of electricity to the Electricity Generating Authority of Thailand, under the Small Power Producer program. It also will provide nominally 20 megawatts of electricity and steam to Bangkok Industrial Gas Plant II, which is located adjacent to the facility. Major equipment in the plant will include a General Electric (GE) Frame 6FA gas turbine generator, a GE steam turbine generator and a heat-recovery steam generator supplied by Zum Energy Division. The project is scheduled for completion in the fall of 1998.

Air Products and Chemicals, Inc., which is headquartered in Allentown, Pennsylvania, is a major international supplier of industrial gases and related equipment, intermediate and specialty chemicals, and environmental and energy systems, with operations in 30 countries and annual revenues of $4 billion.

Fluor Daniel, Inc., the principal subsidiary of Fluor Corporation, is a global engineering, construction and diversified services company with more than 80 offices worldwide.
